Job Title

VP and General Manager

Duties

Directed all aspects of the mine operations at a 100 million ton per year open pit gold operation with annual metal production of 750,000 ounces of gold and 1.2 million ounces of silver. • Managed Joint Venture through quarterly technical review and Joint Venture meetings. • Achieved five consecutive years of record gold production. • Incorporated Lean-Six Sigma approach into the Continuous Improvement Program. • Initiated management training and development program for all levels of supervision. • Developed site Emergency Response and Crisis Management Plans. • Responsible for ancillary facilities associated with operating a rural mining community including; general store, clinic, day care, golf course, RV Park and company housing. Operations Manager Responsible for mine operations, process operations, construction management, engineering, mine geology and regional exploration. Maintained low unit production cost at one of the lowest grade major gold deposits in the world. Reduced maintenance manpower and cost through the successful implementation of effective maintenance planning, preventive and predictive maintenance systems. Implemented comprehensive Non Destructive and Acceptance Testing programs for both mobile and plant maintenance. Implemented a mine dispatch system increasing the effective utilization of equipment. Implemented comprehensive loss control program into operations and achieved L.C. level 8. Technical Services and Ore Process Manager Optimized the pit and dump designs increasing gross revenue by 20%. Directed the construction of 64 million dollar process plant to treat refractory ore. Developed life of mine plan including reclamation and closure plan. Refined hydrologic model and implemented effective mine dewatering program. Directed geotechnical review of the pit wall resulting in an optimized pit redesign. Managed construction of 20 million square feet of dedicated pad and 10 million square feet of mill tailings impoundment. Mine Manager Restructured site blasting program optimizing fragmentation and geotechnical stability. Established key efficiency indicators for mine operations. Achieved two million man-hours without a lost time accident. Maintained mining cost at less than \$0.65 per ton. Established effective hot change program.
